

# NEW WALK-BEHIND AERATORS

*Aerate & Play*

PlanetAir 21 with Trailer

PlanetAir 29 with Trailer

PlanetAir 37 with Trailer

## Aerate a green in less than 10 minutes.

**PlanetAir Knifing: more aeration, less disruption.** The patented planetary gear drive puts the tines through a loop action which creates a small incision at the soil surface and a loop movement below, relieving compaction with minimal surface disruption. PlanetAir knifing cuts plant stems and roots, this results in finer textured turf and less thatch.

**PlanetAir Coring: Less compaction, less clean-up.** PlanetAir coring tines combine a knife and coring tube. The coring tube compresses and removes plugs. The knife stirs the soil in a complete loop around the area where the plug was removed relieving the compaction of the coring process. The rotor and the housing knocks the soil off the cores.

### Features:

- Aerates at 1.8 - 3.8 mph with an oil-free 3-speed transmission
- Produces up to 30 holes/sq ft - determined by ground speed and tine setup
- Fast depth adjustment: between 1.5" to 3" deep
- Operator safe, light weight, walk-behind design
- Dual drive rollers to handle sloped conditions
- Only 18 minutes to switch between coring and knifing tines
- Quick transport with optional easy to load aluminum trailer.
